EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James Lowe on 1/5/05.

The application has been amended as follows:

In claim 1; line 12, after "cutting drum";

---when the primary cutting drum turning mechanism is not in operation,---
has been inserted

2. The following is an examiner's statement of reasons for allowance: The prior art of record includes Becker (U.S. Patent number 4,486,051) which shows a mining machine with cutting drum powered by two motors. Smith, et al. (U.S. Patent number 6,062,650) teaches a mining machine which includes variable speed control for the cutter motor. The prior art of record fails to disclose or suggest the mining machine as called for in claim 1, specifically including primary and secondary cutting drum turning mechanisms with the secondary mechanism in driving connection with the cutting drum when the primary mechanism is not in operation, for causing turning movement of the

cutting drum at a speed much less than cutting speed. The prior art also fails to disclose or suggest the mining machine with motor and secondary mechanism including an adapter and torque shaft connecting means with means for rotating the adapter at a speed significantly slower than the cutting speed as called for in claim 3.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
